

ASARE KWAKU OBENG

Software Engineer | Frontend, Backend & Full-Stack Systems | Web, Mobile & Blockchain

Accra, Ghana

Email: kayasare1234@gmail.com

GitHub: <https://github.com/As-a-re>

LinkedIn: <https://www.linkedin.com/in/kwaku-obeng-asare22371833>

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building **scalable backend systems, cross-platform applications, and blockchain-based solutions**. Proficient in JavaScript and Python, with a strong record of delivering **production-ready software** across web, mobile, desktop, and decentralized environments. Experienced in API design, system architecture, and AI-enabled applications, with exposure to both enterprise IT operations and startup-style product development. Focused on building reliable, maintainable systems and progressing toward senior engineering responsibility.

CORE COMPETENCIES

Backend & Systems

Node.js, Express.js, RESTful API Design, Authentication & Authorization, Scalable Backend Architecture

Frontend & Mobile

React, React Native, Next.js, Flutter

Databases

MongoDB, MySQL, POSTGRESQL

Blockchain & Web3

Sui Blockchain, Smart Contracts, Decentralized Application (dApp) Architecture

AI & Intelligent Systems

Natural Language Processing (NLP), Speech Recognition, Computer Vision

DevOps & Cloud

Git, Vercel, CI/CD Pipelines, Cloud Deployment

PROFESSIONAL EXPERIENCE

Backend Developer

Gramophone Music Academy | Jun 2024 – Sep 2024

Designed and deployed backend services for a **school management system** supporting 100+ student records and operational workflows.

Built RESTful APIs and optimized database schemas, improving query performance by approximately **30%**.

Collaborated with frontend teams to integrate APIs and deliver end-to-end features, reducing feature delivery time by **20%**.

Structured backend components to improve system reliability and maintainability, achieving **~99% service availability** during active usage.

IT Manager Intern

Ghana Atomic Energy Commission | Feb 2024 – May 2024

Supported enterprise IT operations across multiple departments, contributing to business continuity and service reliability.

Assisted with infrastructure support and system maintenance, helping reduce downtime incidents by **15%**.

Participated in IT governance and security practices, gaining exposure to enterprise compliance and data protection standards.

Full-Stack Developer

Graviti Creatives | Oct 2025 – Dec 2025

Led the development team in Designing and implementing **end-to-end management systems** (organizations administration, inventory tracking, and client workflow platforms) using **React, Node.js, Typescript, POSTGRESQL and MongoDB**.

Built **role-based access control** and authentication modules, ensuring secure multi-user environments across applications.

Developed **RESTful APIs** and integrated them with frontend interfaces, reducing manual administrative tasks by **40%**.

Delivered **responsive, aesthetic UIs** with React, Tailwindcss, improving user adoption and accessibility across web and mobile.

Optimized database queries and backend logic, achieving **25% faster response times** and improved scalability for growing user bases.

Collaborated with design and product teams to translate business requirements into **production-ready systems**, deployed via **Vercel and CI/CD pipelines**.

Contributed to **project documentation and code reviews**, ensuring maintainability and knowledge transfer within the engineering team.

RECENT PROJECTS

Servify – Cross-Platform E-Commerce Application

Built a scalable mobile e-commerce application supporting authentication, product listings, and transactional workflows.

Designed backend services to support **1,000+ concurrent users** and future feature expansion.

ICD – Driving School Management System

Delivered a full-stack platform with role-based access control, scheduling, and administrative workflows.

Improved operational efficiency by approximately **40%** through process automation.

Sui-Vote – Blockchain-Based E-Voting System

Co-ordinated a team of developers to develop a decentralized voting platform on the **Sui blockchain**, ensuring transparency, immutability, and secure voting workflows.

Talk-Health – AI Health Assistant

Built an AI-powered chatbot with **speech and text support**, including multilingual capability (English and Akan).

Developed a model with health related data to help with the answering of the health related questions.

Applied NLP and speech recognition to improve accessibility to health-related information.

EDUCATION

Bachelor of Science (BSc) – Information Technology

University of Ghana | Jan 2023 – Sep 2026

ADDITIONAL INFORMATION

Strong interest in **scalable backend systems, AI-enabled applications, and blockchain technologies**

Active contributor to engineering projects and open-source repositories on GitHub

Committed to continuous learning and engineering best practices

Track record with proven ability to lead, coordinate, and initiate engineering projects across backend, mobile, and blockchain systems, delivering scalable and production-ready solutions.
