

ASARE KWAKU OBENG

Software Engineer | Frontend, Backend & Full-Stack Systems | Web, AI, Mobile & Blockchain

Accra, Ghana | Email: kayasare1234@gmail.com Phone: +233 (0)531632559

GitHub: github.com/As-a-re | LinkedIn: linkedin.com/in/kwaku-obeng-asare22371833

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building scalable backend systems, cross-platform applications, and blockchain-based solutions. Proficient in JavaScript and Python, with a strong record of delivering production-ready software across web, mobile, desktop, and decentralized environments. Experienced in API design, system architecture, and AI-enabled applications, with exposure to both enterprise IT operations and startup-style product development. Focused on building reliable, maintainable systems and progressing toward senior engineering responsibility.

CORE COMPETENCIES

Backend & Systems: Node.js, Express.js, RESTful API Design, Authentication & Authorization, Scalable Backend Architecture

Frontend & Mobile: React, React Native, Next.js, Flutter, Electron

Databases: MongoDB, MySQL, PostgreSQL, Supabase

Blockchain & Web3: Sui Blockchain, Smart Contracts, Decentralized Application (dApp) Architecture

AI & Intelligent Systems: NLP, Speech Recognition, Computer Vision

DevOps & Cloud: Git, Vercel, CI/CD Pipelines, Cloud Deployment, Netlify

PROFESSIONAL EXPERIENCE

Backend Developer – Gramophone Music Academy (Jun 2024 – Sep 2024)

- Designed and deployed backend services for a school management system supporting 100+ student records and workflows.
- Built RESTful APIs and optimized database schemas, improving query performance by ~30%.
- Collaborated with frontend teams to deliver end-to-end features, reducing delivery time by 20%.
- Improved backend reliability and maintainability, achieving ~99% uptime.

IT Manager Intern – Ghana Atomic Energy Commission (Feb 2024 – May 2024)

- Supported enterprise IT operations across multiple departments.
- Assisted with infrastructure support and maintenance, reducing downtime by 15%.
- Participated in IT governance and security practices.

Full-Stack Developer – Graviti Creatives (Oct 2025 – Dec 2025)

- Led development of end-to-end management systems using React, Node.js, TypeScript, PostgreSQL, and MongoDB.
- Implemented role-based access control and secure authentication modules.
- Developed RESTful APIs integrated with frontend interfaces, reducing manual tasks by 40%.
- Built responsive UIs with React and Tailwind CSS, improving usability.

- Optimized backend logic and database queries, achieving 25% faster response times.
- Collaborated with product and design teams; deployed systems via Vercel and CI/CD pipelines.

RECENT PROJECTS

Servify: Scalable cross-platform e-commerce application supporting 1,000+ concurrent users.

ICD: Driving school management system improving administrative efficiency by ~40%.

Sui-Vote: Blockchain-based e-voting system on the Sui blockchain ensuring secure and transparent elections.

Talk-Health: AI chatbot with multilingual (English & Akan) speech and text support for health assistance.

Mama-Care: AI-powered prenatal monitoring platform with real-time health tracking, risk prediction, and AI video consultation for continuous maternal healthcare support.

EDUCATION

Bachelor of Science (BSc) – Information Technology

University of Ghana (Jan 2023 – Sep 2026)

ADDITIONAL INFORMATION

- Strong interest in scalable backend systems.
- AI-enabled applications, and blockchain technologies.
- Active open-source contributor on GitHub.
- Proven ability to lead, coordinate, and deliver production-ready systems.
